Education

CADD Centre Training Services

Kerala, India
2012

● Diploma in Interior and Architectural Designing.

The design stages involved in land development and building design (Architecture) are surveying, 2D drafting, 3D modeling, and analysis. The courses provide exposure to multiple combinations of tools encompassing AutoCAD, Revit Architecture, 3Ds Max, to suit the career choices of students in civil, architecture / building, and interior design. They comprise the entire engineering and architectural design cycle - from 2D drafting, 3D modeling landscaping, structural analysis, and project planning & management.
